

VLGA Climate Change Working Group &
Earthsharing Australia present:
**Combatting 'Greenwash' Locally:
is "less bad" good enough?**

Frank de Jong
(Greens Leader, Ontario)

The VLGA and Earthsharing Australia are privileged to have access to a recognised international expert on Green economics during his Australian Tour in July. Frank de Jong is better known in Canada for coining the term “the invisible green hand of market forces”.

Frank will provide entertaining and insightful views on local government and provincial responses to climate change in Canada.

By sharing these with Victorian local governments, community climate change groups and other environment groups, we can learn from each other to better understand the 'how, what and why' of responses that work at the local level.

An inspiring opportunity to network and be informed. And of course to draw hope and applicable lessons from our international guest.

Date: Thursday 26th July

Time: 7:00—8:30pm

**Venue: Large Meeting Room
60L, 60 Leicester St, Carlton**

Note: We will serve drinks, cheese and light desserts during the networking session to begin at around 8.15pm

RSVP: **Numbers will be limited, so make sure you secure your place via phone (03) 9347 2233 or via email deanna@vlga.org.au**
